

Akro-Mills Drawer Divider Guide

4-Compartment Design with Fold-and-Tab Construction

Specifications:

- Drawer interior: 5 3/4" wide x 1.2" tall
- Each piece: 4" wide x 2 7/8" tall
- Yield: 6 pieces per sheet = 3 dividers per sheet
- 2 pieces tape together to form one 4-compartment divider

SINGLE PIECE LAYOUT

ASSEMBLY INSTRUCTIONS

1. Cut out piece along solid outer lines
2. Cut the center vertical line (bottom half only - solid line)
3. Fold both outer tabs UP along dashed lines (these become divider walls)
4. Fold the center section along horizontal dashed line
5. Take TWO pieces and interlock them perpendicular to each other
6. Tape the tabs to adjacent walls to stabilize the divider

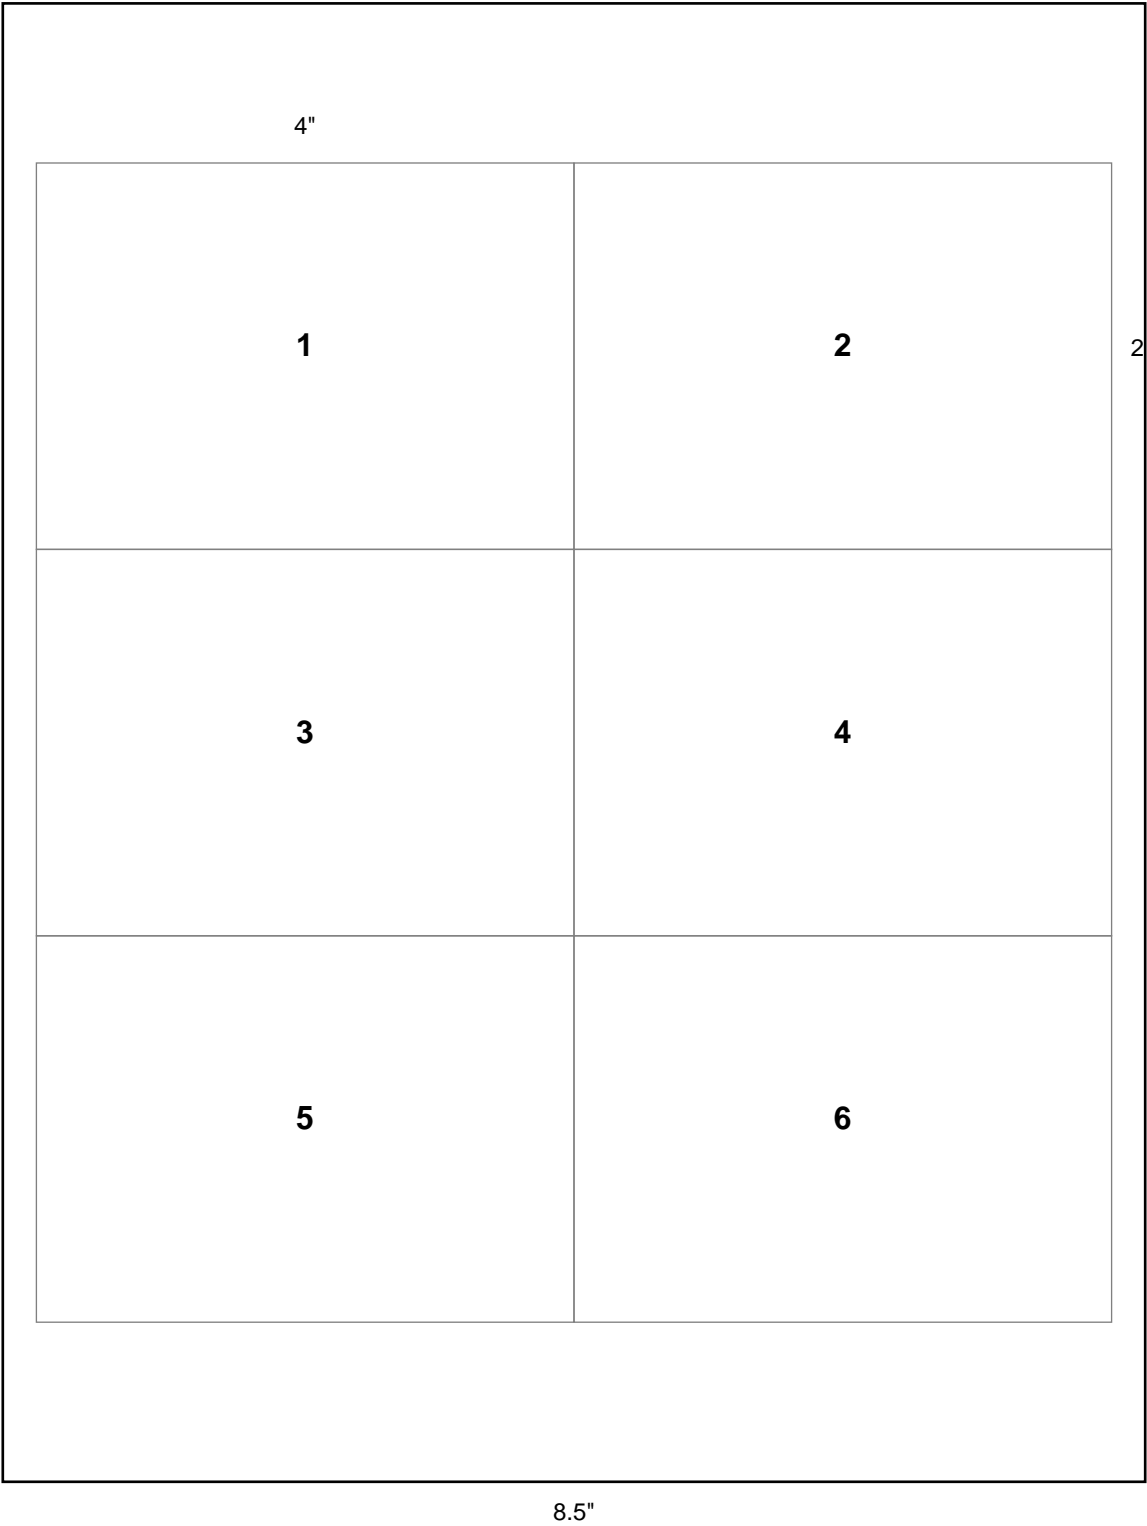

MATERIAL CALCULATOR

- 6 pieces per 8.5" x 11" sheet
- 2 pieces = 1 complete divider
- 3 dividers per sheet

For 60 dividers: $60 \div 3 = 20$ sheets

Cutting Layout - 8.5" x 11" Sheet

6 pieces per sheet (2 across x 3 down)

Waste: 0.5" sides x 2.375" top/bottom = minimal waste

CUTTING TIPS

- Use a paper cutter for straight cuts
- Cut vertical strips first (4" wide), then cut to 2 7/8" height
- Score fold lines with empty ballpoint pen for crisp folds
- Cut the center slit with scissors or craft knife
